

MIN GEN TEC

Mining & Generation Technology - Made in Germany

**NETWORK FOR
INNOVATION &
INTERNATIONALISATION**

Lusatia

For centuries, it's been Germany's **energy region** – and now it's a hotspot in the **energy transition**: **Lusatia**, located in southern Brandenburg and northern Saxony, is a strong growth region full of opportunities in the **German-Polish-Czech border triangle**.

Our goals

The **MinGenTec** initiative supports the **innovative development of products and services and the opening up of new business fields and international markets.**

The initiative is aimed at Lusatian companies from the mining, power plant and restructuring sectors as well as related segments and industries including renewable energies, storage technologies and automation technology.

It **focuses** on supporting **small and medium-sized enterprises (SMEs)** in the **cross-border region of Lusatia**.

Its key objective is to pool economic and scientific **expertise** and to support companies in adapting to the changing environment and structural change in Lusatia due to the phase-out of coal.

Around 300 companies, research facilities and institutions are now involved in the **MinGenTec** network initiative.

Networking

- Knowledge exchanges
- Building partnerships
- Network meetings

Innovation

- Innovation checks
- Innovation workshops
- Partner finding platforms

Internationalisation

- Target market events
- Market exploration trips and grants
- Participation in trade fairs

PR and marketing

- Information sharing (incl. newsletters and social media)
- Specialist publications
- Brochures

MinGenTec is also online on the koop-bb.de community platform.
